PROJECTS

- **CRM** (Dec'23-Feb'25)
 - The Employee–Student Management Portal is a full-stack web application designed to make daily tasks easier for both employees and students.
 - Built using Next.js, Tailwind CSS, and MySQL for a fast, modern, and responsive experience.
 - The Employee portal includes features for batch management, HR tasks, sales tracking, attendance, and admin controls.
 - The Student portal helps manage student details, courses, and supports easy communication between students and the institution.
 - Aim to improve work efficiency, data handling, and coordination between staff and students.
- **portfolio website([view](#))** (Jan'25)
 - Developed a modern, responsive portfolio website using Next.js, Tailwind CSS, and Framer Motion. The site features animated project cards, category-based project filtering, and a visually appealing dark mode.
 - Integrated smooth transitions and interactive UI elements for an engaging user experience.
